Security label

Security labels

Four **RATHGEBER security systems** protect your products from tampering and misuse: **RPK, RPS, VOID and RSZ**. Whether you want to seal information and prevent false entries (RPK), make security labels unusable (RPS/VOID) or cause them to disintegrate into tiny pieces if there is an attempt to remove them, as is typical for road tax discs or TÜV inspection stickers, we have a solution for every security requirement.

Additional security features include security stamping, holograms, fluorescent colours and identification markers.
